

10-September 2012

To whom it may concern:

This is to certify that AES Arabia Ltd has executed a 27,364 cubic meter per day Sea Water Reverse Osmosis system to our Manifa-Tanajib Seawater Treatment Plant Expansion project for Saudi Aramco.

AES has completed their activities on this project in a very professional manner. Overall, we are very satisfied with their performance for this project and look forward to working with them again in the near future.

Yours Respectfully,

Koichiro Enomoto
Senior Manager
Procurement Department
JGC Gulf International Ltd.
