

## PRODUCT DATA

## AES-A-329 DISPERSANT FOR CLEANING

#### **DESCRIPTION AND USE**

AES-A-329 is designed to represent one of the most effective dispersants during cleaning of water systems. It is designed to optimize the dispersion of calcium carbonate deposits, iron oxides and mangnous oxides. It helps in loosening of the deposits by crystal distortion and prevents redeposition of the removed deposits by keeping in dispersed form.

#### CHEMICAL FEEDING AND CONTROL

AES-A-329 is normally fed continuously during the cleaning operation. However shot feeding may be satisfactory in some circumstances. The product may either be fed neat directly from the shipping container or diluted with water and mixed in chemical feed tank. It is advisable to use polypropylene or HDPE for dosing system.
