

PRODUCT DATA

AES-A-452 BOILER WATER ANTISCALANT/ SLUDGE CONDITIONER

DESCRIPTION AND USE

AES-A-452 is a phosphate based formulation with a multifunctional carboxylated polymer dispersant designed for use as a boiler water treatment. The product is designed for use in boiler systems having softened makeup water and operated on the phosphate cycle.

AES-A-452 provides one of the most effective polymers for modern, higher heat transfer boilers.

CHEMICAL CONTROL

AES-A-452 is normally fed continuously to the system being treated. However, shot feeding may be satisfactory in some circumstances. The product may be fed neat or diluted and mixed in a chemical feed tank with the other materials required to complete the program. Normal materials of construction are satisfactory for the chemical feed system.

However, copper, copper alloys, and aluminum metallurgy must be avoided.

AES-A-452 is controlled by a phosphate test on the boiler water. The specific control ranges vary depending upon system operating conditions and will be specified by the technical representative servicing the facility.

TYPICAL PROPERTIES

Appearance: Colourless To Pale Yellow Liquid

Odor: Practically none

Flash Point: None

Specific Gravity: 1.08-1.12

pH (undiluted): 8.0-13.0

Freeze Point: < -3°C(27°F)

(All values approximate)

SAFETY AND HANDLING

Do not take internally. If ingested, drink at least two glasses of water and get medical attention. Contact with eyes causes irritation. If eyes are contacted, immediately flush with clear water for 15 minutes and if irritation persists, get medical attention. For skin contact, wash with soap and water. For additional information, the Material Safety Data Sheet is available on request.

PACKAGING

AES-A-452 is packaged in 200 and 25liter (nominal volume) plastic drums.

AES TREATMENT PROGRAMS & SERVICES

Cooling Water Treatment Programs

Corrosion Inhibitors
Antiscalants & Antifoulants
Biocides
Antifoams

Boiler Water Treatment Programs

Oxygen Scavengers
Corrosion Inhibitors (Pre-Boiler, Boiler and After
Boiler)
Deposit Inhibitors (Sludge Conditioners)
