Mr. Mohammed Shahin, Senior QA/QC Engineer
Mr. Ernesto Maglasang, Eng – Electrical & Instrumentation
Mr. Sajjad Ahmed, Materials Engineer

Subject: PALL Corporation Letter of Appreciation

Dear Mr. Malki,

I wanted to take a moment, on behalf of Pall Corporation, to congratulate you and your staff for their dedication and enthusiasm in the performance of their respective roles in the successful delivery of the TOTAL E&P Yemen, CFU 1 project.

As we all know, this was not an easy project to execute given the very demanding TOTAL specifications and the equally demanding scrutiny of their engineer, TECHNIP Abu Dhabi.

It is typically not appropriate to single out any single person or department because, as we all know, projects can only be successful if every person and discipline works as a team. Despite this statement, I would like to particularly single out the quality of the work done in the skid assemblies and the attention to detail. The quality workmanship is not always evident from an engineering drawing and can only be appreciated once the final product is available for inspection. For this I would like to make a special mention of Mr. Kamal and his team. Mr. Kamal, please pass this message to your staff and all the people I met during the course of the final inspection and congratulate them on their quality especially given the constant delivery pressures.

We have no doubt the CFU2 project will be of equal quality and we look forward to your continued support when called upon for the commissioning.

Like all projects, we had our share of emotional discussions. We were all called upon to defend our respective interests. In the end, we found fair, equitable and mutually acceptable solutions.

On a personal level, I must say that I enjoyed working with, and meeting, each and everyone of your staff and take with me new friendships that I hope will endure long after the life of the project.

Mr. Dilip Lulla is handling the CFU2 project on behalf of PALL with Mr. Haitham Hamed on behalf of AES and we are pleased to see the spirit of collaboration continuing.

Sincerely,

Ray Cocomello
