

PRODUCT DATA

AES-A-1009 COOLING WATER CORROSION & SCALE INHIBITOR

DESCRIPTION AND USE

AES-A-1009 is designed as a corrosion inhibitor for open, recirculating cooling water systems. This product contains a synergistic blend of zinc, Polymer & phosphonates. The synergistic blend assures optimum corrosion control for systems operated with makeup water containing moderate concentrations of hardness and alkalinity.

AES-A-1009 is compatible with all products including chlorine at use level concentration.

CHEMICAL FEEDING AND CONTROL

AES-A-1009 is normally fed continuously to the systems being treated. However, shot feeding may be satisfactory in some circumstances. The product may either be fed neat directly from the shipping container or mixed in a chemical feed tank. Normal materials of construction are satisfactory for the chemical feed system: however, copper, copper alloys and aluminum metallurgy must be avoided.

AES-A-1009 normally controlled by an Total phosphate test utilizing a simple color comparator for measurement. The specific control ranges vary depending upon system conditions and will be specified by the technical representative servicing the facility.

TYPICAL PROPERTIES

Appearance: Yellow To Amber Liquid

Odor: Characteristic

Flash Point: None

Specific gravity: 1.18 To 1.25

pH (undiluted): 9.00 To 13.0

Solubility: Soluble in water at all proportions

(All values approximate)

SAFETY AND HANDLING

AES-A-1009 may be toxic by ingestion. Do not take internally. If ingested, drink at least two glasses of water and get medical attention. Contact with eyes causes severe irritation or burns and possible blindness. If eyes are contacted, immediately flush with clear water for 15 minutes and get medical attention. For skin contact, wash with soap and water. For more information, the Material Safety Data Sheet is available on request.

PACKAGING

AES-A-1009 is packaged in 200 and 25-liter (nominal volume) non-returnable plastic drums.

AES TREATMENT PROGRAMS & SERVICES

Cooling Water Treatment Programs

Corrosion Inhibitors
Antiscalants & Antifoulants
Biocides
Antifoams

Boiler Water Treatment Programs

Oxygen Scavengers
Corrosion Inhibitors (Pre-Boiler, Boiler and After
Boiler)
Deposit Inhibitors (Sludge Conditioners)
Antifoams
Alkalinity Builders

Potable Water Treatment Programs

Corrosion Inhibitors
Deposit/ Scale Inhibitors
Disinfectants

Fuel Treatment (Solid & Liquid)

Deposit/ Corrosion Inhibitors
Combustion Catalysts

Coagulants & Flocculants

Organic & Inorganic

Odor Control Programs

Masking Agents
Reactive Odor Control
Enzymes

Hard Surface Cleaners

General Purpose Cleaners
Descalers
Neutralizers

Brewery & Bottling Plants

Pasteurizers
Bottle Washers
Conveyer Chain Lubricants

Metal Treatment Chemicals

Cutting Lubricants
Degreasers
Passivators
Phosphatizing Chemicals
Electroplating Chemicals

R.O. Water Treatment

Scale Inhibitors
Membrane Cleaning Chemicals
ANSI/ NSF Approved Antiscalants

Thermal Desalination Treatment

Scale and Corrosion Inhibitors
Antifoams
Descalers

Steam & Condensate Programs

Corrosion Control
USDA/ FDA Approved Additives

Raw Water & Wastewater Programs

Coagulants Odor control
Flocculants Enzymes
Disinfectants Bacterial Spores
Antifoams Emulsion Breakers

Process Treatment Programs

Specialty Chemical Additives

Commercial Laundry Chemicals

Built Detergents
Emulsifiers
Fabric Softeners
Peroxide Bleach
Chlorine Bleach
Scoring Agents

Services

Technical & Engineering Consultations
Analytical Services
Ion Exchange Resins Evaluation
Reverse Osmosis Cleaning

Equipment Supply

Water & Wastewater Treatment Plants
Filters, Pumps
Tanks
Chemical Feed Systems
PH Controllers
Blow down Controllers
Automatic Control Systems
SCADA
