

PRODUCT DATA

AES-A-131BW BOTTLE WASHING COMPOUND

DESCRIPTION AND USE

AES-A-131BW is a Polymer Specialty Bottle Washing Formulation, which has the following capabilities:

- Improves washing efficiency by facilitating soil removal from bottles and by keeping that soil dispersed and suspended in solution.
- Controls metal contaminants in the early and in the advanced washing stages.
- Prevents scale build-up in the rinse stages and on the equipment itself.
- Minimizes the effect of scuffing which allows long-term performance of glass bottles.
- Also prevents spotting, staining and filming of bottles by soil and other contaminants.

CHEMICAL FEEDING AND CONTROL

AES-A-131BW is normally fed continuously to the rinse stage of the Bottle Washer. Shot feeding can be applied in the Soaker Zone during turn around or change of wash dirty water. AES-A-131BW can be controlled with a simple drop test or Colorimetric method. The specific control ranges vary depending upon system operating conditions and will be specified by the technical representative servicing the facility.

TYPICAL PROPERTIES

Appearance: Light yellow liquid
Odor: Faint bland odor
Flash Point: None
pH: 3.5-4.5
Solubility: Completely soluble
Specific Gravity: 1.15 - 1.2
(All values approximate)

SAFETY AND HANDLING

Store in a cool dry place. Keep containers tightly closed when not in use. **Inhalation** not considered a problem. **Skin contact:** wash with soap and water. If irritation persists, get medical attention. **Eye contact:** Immediately flush with clear water for 10 minutes and get medical attention.

PACKAGING

AES-A-131BW is packaged in a 200 and 25 liter (nominal volume) non-returnable plastic drums.
