

PRODUCT DATA

AES-A-329C COOLING WATER SCALE /DEPOSIT INHIBITOR

DESCRIPTION AND USE

AES-A-329C is designed to represent one of the best available "all organic" treatment technologies for open, recirculating cooling water systems operated with high hardness, high alkalinity makeup waters. It is "multi dispersant" designed to optimize inhibition of calcium carbonate deposits, iron oxides, and manganous oxides; key benefits should the makeup water contain low level concentrations of iron and manganese. AES-A-329C multidispersant in nature permits higher cycles than obtainable with competitive all organic products, thus saving makeup water and treatment chemicals.

CHEMICAL FEEDING AND CONTROL

AES-A-329C is normally fed continuously to the system being treated. However, shot feeding may be satisfactory in some circumstances. The product may either be fed neat directly from the shipping container or diluted with water and mixed in a chemical feed tank. Normal materials of construction are satisfactory for the chemical feed system. **The exact dosages based on water quality will be guided by technical representative.** AES-A-329C is normally controlled by an organic phosphonate test. Experience has shown that the most reliable tests utilize a UV light for organic phosphonate reduction and a colorimeter for measurement. However, various color comparator and drop tests may also be satisfactory when properly standardized.

TYPICAL PROPERTIES

Appearance: Colorless To pale yellow liquid
Odor: Mild characteristic
Flash Point: None
Specific gravity: 1.03 - 1.09
pH: <5
(All values approximate)

SAFETY AND HANDLING

Do not take internally. If ingested, drink at least two glasses of water and get medical attention. Contact with eyes causes severe irritation or burns. For skin contact, wash with soap and water. For additional information, the Material Safety Data Sheet is available on request.

PACKAGING

AES-A-329C is packaged in 200 and 25 liter (nominal volume) non-returnable plastic drums.

AES TREATMENT PROGRAMS & SERVICES

Cooling Water Treatment Programs

Corrosion Inhibitors
Antiscalants & Antifoulants
Biocides
Antifoams

Boiler Water Treatment Programs

Oxygen Scavengers
Corrosion Inhibitors (Pre-Boiler, Boiler and After
Boiler)
Deposit Inhibitors (Sludge Conditioners)
Antifoams
Alkalinity Builders

Potable Water Treatment Programs

Corrosion Inhibitors
Deposit/ Scale Inhibitors
Disinfectants

Fuel Treatment (Solid & Liquid)

Deposit/ Corrosion Inhibitors
Combustion Catalysts

Coagulants & Flocculants

Organic & Inorganic

Odor Control Programs

Masking Agents
Reactive Odor Control
Enzymes

Hard Surface Cleaners

General Purpose Cleaners
Descalers
Neutralizers

Brewery & Bottling Plants

Pasteurizers
Bottle Washers
Conveyer Chain Lubricants

Metal Treatment Chemicals

Cutting Lubricants
Degreasers
Passivators
Phosphatizing Chemicals
Electroplating Chemicals

R.O. Water Treatment

Scale Inhibitors
Membrane Cleaning Chemicals
ANSI/ NSF Approved Antiscalants

Thermal Desalination Treatment

Scale and Corrosion Inhibitors
Antifoams
Descalers

Steam & Condensate Programs

Corrosion Control
USDA/ FDA Approved Additives

Raw Water & Wastewater Programs

Coagulants Odor control
Flocculants Enzymes
Disinfectants Bacterial Spores
Antifoams Emulsion Breakers

Process Treatment Programs

Specialty Chemical Additives

Commercial Laundry Chemicals

Built Detergents
Emulsifiers
Fabric Softeners
Peroxide Bleach
Chlorine Bleach
Scoring Agents

Services

Technical & Engineering Consultations
Analytical Services
Ion Exchange Resins Evaluation
Reverse Osmosis Cleaning

Equipment Supply

Water & Wastewater Treatment Plants
Filters, Pumps
Tanks
Chemical Feed Systems
PH Controllers
Blow down Controllers
Automatic Control Systems
SCADA

Manufactured in the Kingdom of Saudi Arabia by :
